At the party conference to-day Mr. Sexton's resignation was the chie, subject of discussion. Mr. Sexton was not present.

Justin McCarthy, leader of the anti-Parbeilles, William O'Brien and John Dilion, all deplored Mr. Sexton's course and trusted that he would reconsider his determination to States. that he would reconsider his determintion to retire from political life. They strongly urged the conference to rescind the resoluion which had offended him. After considerable debate the conference

The vote to rescind was taken after a continuous apaston of five hours and a haif. Much of the time was seent in quarreiling and exchanging reproaches, although altogether there was less turbulence than had been leared. After a recess the conference assembled again. It continued far into the night.

The negotiations between Justin accarthy and John it umond, the Parnellite leader, hooking to the recess of the irish fund, now head by Hanker Athro, of Paris, have, roted fruitless, and there will be no further correspondence on the subject between the rival leaders. It is now considered that actions in the English and French courts to decide the owners ip of the moneys held in Paris are inevitable.

The lirst in the actes of meetings desirned by the Unionists to rouse all London against Home Ruis, was held in the Royal Surrey Theatre this evening.

The Marquis of Salisbury was the most notable speaker. He illustrated his opinion of Mr. Gladstone's action towards Ireland with an elaborate metaphor based on the account of the recent dianter in Washington.

"The Fremier," he said, "is digning a celar under the ancient rabric of the empire. He is working carelessiy, as did the men under the old theatre in washington. The Irish leaders are busy quarreling among themselves. There are signs on every side that the dark hight of appreciant is atmost spent and the dawn is breaking. The Liberal party has recently taken a new lease of life and is vallantly fighting by atrong combination between the actual Libnominated Gen. Valez for President at the nast election against Dr. Nunes.

dependent on the will of the President and his followers, who confiscate plants, fine, imprison and even on occasion execute editors by executive decree without trial.

And complaint is made of the suspension of the "personal guarantees" as evidenced by the banishing on mere suspicion and without trial of several leading citizens of Bogota to out-of-the-way parts of the country for being implicated in the riots of last January. No constitutional change can be brought about during the life of Dr. Nunez, for if he does reign with a cast-iron hand it isso thickly lived that he exercises strength without trialing the majority. Moreover, no revolutionary inovement could succeed against the strong army he commands, even were the strong army he commands, even were the survey of the syntage of the relation of the country for being implicated in the riots of last January.
